DIESEL ENGINE COMPONENTS

Bearings

- Copper or aluminum bearing material based on variables unique to each engine system.
- Consistent wall thickness to help ensure proper clearance, uniform oil distribution.
- Consistent crush height for proper clearance and oil flow.

Crankshaft

- Forged and precision machined from premium, high strength steel.
- All crankshaft are precision balanced, both statically and dynamica lly to provide long life.

Cylinder Heads

- Counter bored prechamber protects threads from combustion heat and shock.
- Manufactured to rigid tolerances for proper dimensions. Helps assure smooth sealing surfaces, no warping stresses, durability against cracking and wear.
- Proper machining of water outlet holes to help assure adequate cooling and easy installation.
- Rigid cleaning processes help assure internal passages are free of core sand and metal shavings.
- Loaded cylinder heads offer convenience.

Liners

- Flanges are roll burnished in the radius for increased strength and to eliminate cracking.
- Induction hardened over full length to increase life and reusability.
- Bore Round over complete length which helps assure piston rings conform to liner shape.

CTP® engine parts are designed and manufactured to work hard as an integrated system. We continually improve our techniques to ensure you get quality products with the best technology available in the market.

Piston

- Made of eutectic aluminum silicon alloy for durability and fatigue resistance.
- Specially ground and tapered over full length. Expands to fit liner perfectly at operating temperatures.
- Controlled casting process ensures proper bonding.
- Special heat treatment modifies and improves the grain structure for added strength and durability.
- Hard anodized crown for low friction and prolonged wear resistance.

Piston Rings

- Correct chrome plate thickness makes ring last longer.
- Compression rings made of high strength ductile iron.

Rods

- Forging process results in exceptionally high durability.
- Endurance Testing ensures durability.

Valves

- Friction Welding process ensures a permanent bond between face and valve body.
- Precision heat treatment provides optimal strength which prevents breaking or cracking.

HIGH-HEAD BOLTS

Features of CTP newly designed High-Head Bolts:

- 1. Thicker than the standard bolt head, adding extra wrenching surface.
- 2. Washer face eliminates corner drag.
- 3. Radius under the bolt head increases strength.
- 4. UNR radiused root bolt thread increases fatigue resistance by reducing the notch effect of conventional UN threads.

SEALS & GASKETS

MANUFACTURING

At CTP we manufacture gaskets from materials that are engineered to withstand the high pressures and temperatures of today’s diesel engines. As an engine gasket supplier we are now an Interface Solutions Inc. Certified Partner producing and assembling gaskets and kits with materials that are 100% asbestos-free and 100% Solvent Free. Ultimately we provide parts with the highest quality standards in our state-of the art manufacturing facility with over 60,000 square feet of production space. Our gaskets provide component integration, resulting in durability and reliability, with the quality and value CTP customers have come to expect.

En CTP fabricamos juntas de materiales que soportan las altas presiones y temperaturas de los motores diesel de hoy. Como un surtidor de juntas de motor, ahora somos socios certificados de Interface Solutions Inc. produciendo las juntas y los kits con materiales que son 100% libres de asbestos y 100% libres de solvente. También proveemos piezas de la más alta calidad fabricadas con tecnología avanzada en nuestras instalaciones de más de 60.000 pies cuadrados de espacio de producción. Nuestras juntas permiten la integración de componentes, dando como resultado la durabilidad y confiabilidad que los clientes de CTP esperan.

GASKET MATERIAL

What are the CTP’s Gaskets made out of?

Gaskets are produced from solvent free, environmentally friendly, asbestos free materials. Materials are treated with an anti-stick coating on both sides to better protect the gasket and the machine itself.

¿Que contienen las empaquetaduras CTP?

Las empaquetaduras CTP son fabricadas con material 100% libre de solventes y asbestos. Estas son tratadas con una capa de material anti-resbalante en ambos lados para proteger la empaquetadura y la maquina al mismo tiempo.

ABC GASKET PROGRAM

What is CTP’s ABC Gasket program about?

The ABC Gasket Kit program is designed to consolidate gasket kits and make it easier for the parts person to order and for the rebuilder himself to quickly identify and organize their seals and gaskets. At the same time, they can be assured that everything they need is included for each particular rebuild. Kits are packaged into sub kits (front set, rear set, lower set, etc.) inside the gasket kit box for easy identification.
